

# Pension Review Group

## Welcome to the Pension Review Group (PRG) website

**PRG** is an informal group of members of the Reuters Pension Fund (RPF) and the Supplementary Pension Scheme (SPS).

It was established in 2004, initially to highlight specific concerns of pensioners at that time and represent their views to the Trustees and the Company.

Over the last few years PRG has successfully campaigned for the restoration of annual inflation-linked increases for pensions up to a limit of 2.5%, with the Trustees negotiating a 10-year deal for such annual reviews.

The agreement continues until 2021.

The group continues to represent the interests of all types of members - Pensioners, Deferred and Active - by raising concerns on pensions administration and policy with Trustees.

It also acts as a point of contact for members who have not been able to resolve issues through the normal channels.

Information on the PRG's aims, origins, membership and contact details are described under the banner headings at the top of the page.

Detailed descriptions of our activities since the group's inception can be found by clicking on the Archive section at the bottom of this page.

### Brexit unlikely to bring major pension framework changes - RPF website

**The RPF Trustees' website** has recently been updated with an item on the impact of Brexit for UK pensions and RPF, as well as additional useful information and links in the Members Information section.

Commenting on Britain's referendum vote to leave the EU, the RPF website said, "We are unlikely to see major changes to the UK pension framework in the short or medium term following the referendum."

RPF also assessed the immediate effect of the referendum. "Our initial assessment suggests that the direct impact (of the EU referendum result and subsequent market reaction on our investments) has been relatively limited," the website said.

The full report can be read [here](#).

This website is separate from the Members' Website run by Capita which provides more confidential information on the RPF pension scheme and therefore is password protected.

Members can subscribe to receive alerts when new items are posted on the RPF website. Click [here](#) to sign up.

### Pension increases: RPI rises 3.9% in September 2017

**Inflation figures** for September 2017 were published recently and showed the Retail Prices Index (RPI) rose 3.9%. The Consumer Prices Index (CPI) rose 3%.

These figures will be used for RPF and SPS pension increases from 1 January 2018 for those who retired before 1 January 2017.

In practice, this means that pensions earned before April 1997 in excess of "Guaranteed Minimum Pension" (GMP) will increase by 2.5%, the cap set by the agreement between the company and trustees. Pensions earned between April 1997 and April 2005 will rise 3.9%. Pensions earned after April 2005 will increase by 2.5%.

GMP earned from April 1988 to April 1997 will increase by 3.0%, in line with the CPI.

When GMP is increased, GMP earned pre-1988 is increased by the State through the State Pension.
